

Our Comprehensive Solution to Rounding Optimization

Through the staffing crisis, healthcare facilities are struggling to maintain elite patient care and a safe environment for their patient's because of continued resource constraints. These daily tasks around the hospital have burdened and stressed out frontline staff leading to staff burnout, a decrease in patient satisfaction, and an increase in patient safety events.

Sentact's comprehensive software helps offer hospitals increased efficiencies to be able to do more with less across the continuum. Sentact**Rounding's** expansive database of best practice toolkits allows hospitals to choose and customize surveys tailored specifically to their facility to capture and analyze the data they desire on an efficient and user-friendly platform.

Attempting to provide elite patient care with limited resources can be a struggle for healthcare facilities at any size, but Sentact's rounding software is the solution. Facilities that have implemented Sentact**Rounding** have, on average, seen a 10% decrease in hospital acquired infections and a 13% increase in patient satisfaction.

Hospitals have also realized a full return on their investment with Sentact's rounding solution in the first 3-6 months of implementation on average. Building towards exceptional outcomes can be challenging for hospitals around the nation; but with Sentact, it doesn't have to be.

sentact Rounding

All Rounds – One Comprehensive Platform

SentactRounding empowers healthcare systems to take control of patient engagement, with a single, comprehensive insights tool to maximize safety, quality, environments of care, nursing and patient experience.

Quality & Patient Safety

- Chart Audit
- Clinical Tracers
- ISO audits
- Discharge Planning, Summary, & Instructions
- 7-Day Readmission Audit Tool
- National Patient Safety Goals
- Fall Prevention & Morse Fall Scale
- Pressure Ulcer Prevention & Braden Scale
- Mental & Behavioral Health
- Ligature Risk
- Restraints
- Medication Error Root Cause Analysis
- Pharmacy & Medication Management
- Ambulatory Surgery Center
- Procedural Care
- Long-term Care

Emergency Preparedness

- COVID-19 Audits/Rounds
- Hospital Emergency Response
- Surge Capacity Plan
- Infectious Diseases Planning & Response
- Hospital Evacuation
- Rapid Discharge
- Resuming & Reopening of Healthcare Services

Nursing

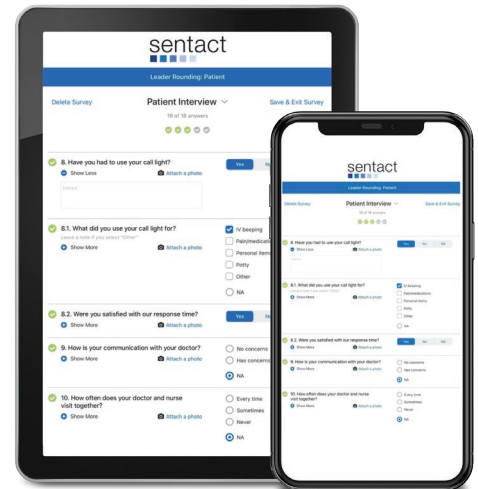

- Bedside Change of Shift Handoff
- Hourly/Purposeful Rounding
- Narrating Care
- Staff Competency
